Abuja, Nigeria | P: +2348098563900 | modupeadeonojobi@gmail.com | <https://github.com/modupeadeonojobi>

EXPERIENCE

SEAMHEALTH INNOVATIONS

Backend Developer

Abuja

November 2021 – Present

- Create a WhatsApp chatbot in one week.
- Creating 100% customer-centric, domain driven solutions while working with product managers, development managers, QAs, and other stakeholders for SeamHealth Innovations.
- Secure web applications from vulnerabilities and data intrusion by 100% using Spring Security, JWT, BCrypt and Data Transfer Object Design pattern
- Participate in all agile ceremonies, code reviews, epic breakdowns, impact mapping, story planning, live bug fixes, and so on, all while delivering bug-free solutions in a team of other talented developers.
- Write unit, integration, and UI tests to make sure new or modified features perform the same as requirements' description. Also create perf guard tests to test performance with a large database.

LAWPAVILION

Software Developer (Remote)

Lagos

March 2021 – Present

- improved usability and reduced run-time performance by 30%.
- Retained 25% existing clients for the organization by reworking their code base while debugging and upgrading the web applications.
- Identified and resolve bugs in software programming code that arise during field testing.

OASIS MANAGEMENT

Full Stack Developer

Abuja

October 2020 – November 2021

- Increased customer service performance by 30% in one month by developing two support ticketing applications on my own for a top-tier national and state agency.
- Increased application speed with 20% by designing optimized database systems for manipulating big data using Spring Data JPA and Postgres.
- Developed Single Page Applications for top-tier national and state agencies with Angular on the front and Spring Boot on the back, to ease client processes.
- Debugged live applications and rectified defects for improving good performance
