MODUPE ADE-ONOJOBI
SOFTWARE ENGINEER

Abuja, Nigeria | P: +2348098563900 | modupeadeonojobi@gmail.com | https://modupeadeonojobi.netlify.app/

SUMMARY

A software engineer with back-end and front-end development experience. Proven track record of developing successful applications in a range of programming languages and frameworks. Capable of working both independently and as part of a team, and familiar with agile development methods.

EXPERIENCE

BACKEND ENGINEER
SeamHealth Innovations   *November 2021 – Present*

- Secure web applications from vulnerabilities and data intrusion by 100% using Spring Security, JWT, BCrypt, and Data Transfer Object Design pattern.
- Creating 100% customer-centric, domain-driven solutions while working with product managers, project managers, QAs, and other stakeholders for SeamHealth Innovations.
- Write unit, integration, and UI tests to make sure new or modified features perform the same as the requirements' description. Also, create perf guard tests to test performance with a large database.
- Participate in all agile ceremonies, code reviews, epic breakdowns, impact mapping, story planning, live bug fixes, and so on, all while delivering bug-free solutions in a team of other talented developers.

FULL-STACK DEVELOPER
Oasis Management company   *October 2020 – November 2021*

- Developed Single Page Applications for top-tier national and state agencies with Angular on the front and Spring Boot on the back, to ease client processes by 82%.
- Developed Support Ticketing Applications that increased customer service performance by 35%.
- Improved the performance of the web application by optimizing external resources.
